

NETAJI NAGAR DAY COLLEGE

ACTION TAKEN REPORT

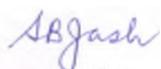

2022-2023

The feedback from the students, teachers and alumni are collected by circulating the Feedback Forms. The data are then compiled and analyzed. Feedback analysis report is available in the college website.

Feedback from Students:

From the analysis of the students' feedback, it is revealed that they are satisfied with the curriculum framed.

	Feedback	Action Taken
1	I wish that routine could be more convenient from the next time as some days I only have one class and some other day I have like 2 to 3 hours of gap between two classes.	Time Table Sub-Committee has considered this issue seriously and the members of the sub-committee have tried their level best so that students do not face any problem like this.
2	Need good behaviour from the college staff.	Every single member of the office staff is kind and encouraging to the students. They are working to improve their offerings so that there won't be any issues for students to deal with in the near future. Staff development programs are conducted by IQAC for motivating the staff.
3	Efforts should be made for more placement of the students	Placement Cell of the college is very active and its members try their best to help more students get employment in various companies/working places after the completion of graduation from this college.
4	Need sitting arrangements in the girl's common room.	College authority has taken initiatives in this matter and allotted some chairs, benches for the girl's common room.
5	College needs more class rooms.	The college faces space shortage. Second instalment of RUSA grant is awaited for development of the second campus.

Feedback from Teachers:

Sl.No.	Feedback	Action Taken
1	Kolkata has extreme heat all summer long. Teachers' room should be air conditioned.	The college is suffering from the shortage of fund. Although the authority of this college is trying to solve this matter.
2	It's difficult to finish the entire curriculum in the allotted time.	For all courses, the College adheres to the syllabus set forth by the affiliated university. Thus, the deadline for finishing the semester is outside of the college's jurisdiction.
3	These days, having a lift is essential for people with health issues.	Authority is seriously looking into this matter.
4	Need more class rooms for teaching and learning environment.	The college faces space shortage. Second instalment of RUSA grant is awaited for development of the second campus.
5	Students will benefit academically from at least one parent-teacher engagement per semester.	Parent-teacher meetings are arranged by the college in a regular basis.
6	For our institution, infrastructure growth is critically needed.	This institution is making efforts for developing its infrastructure. Through the RUSA 2.0 grant, significant improvements to learning resources and infrastructure have been made.
7	Reference books/copies and study materials need to be made available online so that students can access them freely.	The Central Library's online resource is well-equipped. Anyone from this college can avail the books, study materials, university question papers through online mode.
8	Frequent workshops can help teachers become more equipped and acquainted with technical papers.	The concerned teacher who applies for such workshops is released by authority.
9	Provision of using audio-visual aids in every classroom will make the teaching-learning process interesting and more useful.	The college has several numbers of ICT based class rooms. Any department can utilize these class rooms.

Feedback from Alumni:

Sl. No	Feedback	Action Taken
1	<p>Syllabus should be more industry friendly or career oriented. Industry oriented syllabus and practical training are required.</p> <p>The former 2+1 syllabus was much better for in-depth study and assimilation of the topics by the teachers and students too. This syllabus may be pragmatic, but not at all satisfactory for the teachers.</p>	<p>The institution is a Govt. aided college under the University of Calcutta and adheres to the stipulated syllabus. However, two of our faculty members serve as BOS members for two distinct disciplines, and they have been told by the authority to bring up the topic at their upcoming BOS meetings. The Principal is also a syndicate member of the University of Calcutta. She will also raise the issue in the next syndicate meeting.</p>
2	<p>A large area should be designated for lab work for different laboratory oriented subjects, and need more classrooms.</p>	<p>There are already sufficient-sized laboratories for practical base subjects. Regular upgradation are made to the labs.</p> <p>The college faces space shortage. Second instalment of RUSA grant is awaited for development of the second campus.</p>
3	<p>Hopefully the alumni association will play positive role for future development and provide sustainable support to the college.</p>	<p>Authority always welcomes such types of support from the alumni, the extended family members of the college.</p>
4	<p>Co-curricular activities were supported by the college, which also uplifted the spirit among the students.</p>	<p>The college encourages the students by organizing co-curricular activities like inter college debate, dance, extempore, sports etc. competitions time to times throughout the academic calendar. Increased alumni involvement is necessary.</p>
